Commentary

The K2 Global High Alpha Fund returned 2.7% for the month of April.

Global stocks continue on their higher path, driven by the US S&P 500 recording its strongest start to a calendar year since 1987, rising 18% in 2019 so far. The broader international markets, represented by the MSCI AC World TR Net AUD Index, rallied 4.3% in April.

Equity market gains are primarily being driven by ultra-low inflation and the consequent low interest rate environment. Central bank policies remain supportive and investors have vigorously increased exposure to growth stocks, which have continued to re-rate to well above long run averages. The exuberance within markets has seen outsized gains made in the IPO market with recent listings in Zoom Technologies and Pinterest. Another warning sign is that hedge funds have record short positions on the VIX, indicating a sense of complacency and over confidence.

A key positive contributor to Fund performance included JP Morgan in the US, which rallied 15% in April following an above consensus first quarter earnings result. JPM 1Q 2019 highlights included revenue momentum, profitable market share gains and strong operating leverage. JPM currently trades on a PE of 11.5x with a strong capital base and a robust earnings trajectory. Chinese car manufacturer, Guangzhou Auto, was the largest detractor for the month, following significant outperformance in the March quarter. We maintain our positive view on the stock on the back of improving industry demand, imminent new product launches, an undemanding valuation of 6.1x 2019e earnings and supported by a dividend yield of 5.5%.

The Fund increased stock exposure by 4.3% during April to close the month at 73%. The Fund remains unhedged to the AUD at the currency level and with the AUD depreciating 0.6% against the USD for the month, this provided a small tailwind to overall Fund performance.
